

## Application Security Services Assessment Status

UYCARDS-uycards

Release Date: 2025-08-20

This document is valid till 2025-09-19 if there is no any change/commit

Version: 1.5

EPM#BJQT

BB#2e240abdb9

## Summary of the Findings

**No. of Critical Risk Findings: 0****No. of High Risk Findings: 0**

The UYCARDS-uycards development team needs to fix the total of 0 Critical and 0 High risk severity findings discovered during the Checkmarx Static, WebInspect Dynamic and BlackDuck Static Scans conducted/reviewed by the Application Security Team.

## Technical Information:

-WebInspect: reviewed version(s): BB-UYCARDS-uycards ~ master 1.5 BB#2e240abdb9

-Checkmarx: reviewed version(s): BB::UYCARDS::uycards ~ master 1.5 BB#2e240abdb9

-BlackDuck: reviewed version(s): BB-UYCARDS-uycards ~ BRANCH-master 1.5 BB#2e240abdb9

AppSec internal reference No.: APPSEC-306900

Please note that medium risk findings can be escalated to a high risk finding at the discretion of the AppSec team when it can be shown to lead to exploitation. When that happens, the development team will be required to address it before code promotion. Please focus on how this can be remediated before your application is blocked in the future when some/all of these findings are escalated.
